## 29th IYPT 2016: Inspector's Report

June 3, 2016

### Introduction

In line with the IYPT Hosting Agreement (p. 2.3), an Inspection to the premises of the 29th IYPT 2016 took place on May 30-31, 2016. The Inspection was carried out according to a detailed agenda agreed with the LOC and focused on the current status of the preparations. During specific parts of the two-day inspection, following persons took part at meetings, discussions, and visits to the premises:

- Vladimir Kruzhaev, Vice Rector for Science, UrFU
- Andrey Poltavets, Vice Rector for Information Technologies, UrFU
- Olga Inisheva, Deputy Director for Science, SUNC UrFU
- Irina Polyakova, Deputy Director, Inst. for Social and Political Sciences, UrFU
- Anna Boikova, Specialist for Project Management, UrFU
- Anna Krasnova, Director of the Center for Positioning and Brand Technologies, UrFU
- Roman Agrikov, Directorship for Information Technologies, UrFU
- Yulia Pyankova, Volunteer Coordinator, UrFU
- Nikolai Titov, Deputy Vice Rector for General Affairs, UrFU
- Natalya Rakultseva, Director for the Public Dining Facilities, UrFU
- Ilya Martchenko, Inspector from the Executive Committee, IYPT
- Timur Ibragimov, Assistant to the Inspector and Photographer

### Physics Fight rooms

All PFs will take part in the main University building (Ulitsa Mira, 19). The building is within a short walking distance from the Dormitory, however for those staying at the Hotel a bus transfer will be arranged. It is possible to enter the building only through the main entrance.

The building is very large and has a complex internal structure. It is emphasized that reaching some of the PF rooms from the main entrance or from the Office requires up to 9 minutes of walking via several corridors and staircases. The LOC (responsible person: Anna Krasnova) will mount a comprehensive navigation system in the building, giving directions to each PF room from all key places (Dining Halls, entrance, Office) and back, where needed. It is understood that this task is of a high importance. The University has expertise in preparing similar navigation systems. During the Inspection, each room was labeled A...I. With an expected 29 teams, it is nearly certain that at least seven three-teams groups and up to two four-team groups will be required.

Rooms A...G are ideal for three-team groups, while only rooms H and I can accommodate four-team groups. It has been discussed with Timotheus Hell that fight schedules will forcibly locate any four-team groups to H and I.

Two data projectors will be available per room, and the clock shall be displayed on an LCD panel. Detailed specifications of each room is given in the checklist.

The groups A...G are regular flat-floor classrooms, as depicted in the photos below. Some of them (B, D, F) allow for seating of 30 observers.

The groups H and I have large balconies allowing for taking excellent photos and videos of the Physics Fights, as depicted in the photo below. They have especially high seating capacity, allowing for over 50 observers.

PF rooms shall form three clusters, such that coffee breaks can be arranged for each cluster. Cluster A...C includes groups A (room И-310), B (room И-306) and C (room И-329). These three rooms are located within 1 or 2 minutes of walking from the IYPT office. Their positions on the level 3 of the building plan are depicted in the scheme below.

Cluster D...G includes groups D (room M-524a), E (room M-526), F (room M-527) and G (room M-538). Those four rooms are located within 8 or 9 minutes of walking from the IYPT office via a network of corridors and staircases. Their positions on the level 5 of the building plan are depicted in the scheme below.

Cluster H...I includes groups H (room B-202) and I (room B-203) which are reading halls of the university library. Those two rooms are located within 8 minutes of walking from the IYPT office via a network of corridors and staircases. Their positions on the level 2 of the building plan are depicted in the scheme below.

### Conference Hall for Opening and Closing Ceremonies

Opening and Closing Ceremonies shall be held in the Assembly Hall (room ГYK-206) with 700 seats and many wireless microphones. Detailed specifications of the Conference Hall is given in the checklist.

### **Jury Meeting**

Jury Meeting shall be held in the Academic Council Hall (room И-420) which is an amphitheater-type auditorium ideal for the meeting.

### **Toilets in the University building**

Toilets are available in many parts of the building and are generally marked with symbols “М” (gentlemen) and “Ж” (ladies). The toilets significantly vary in design and in standard. In many cases, the toilets for two genders are not next door, in particular those near Groups D...G. Directions will be given to the nearest toilets (with respect to each Physics Fight room and Dining Hall). Toilet paper, soap dispensers and paper towels will be provided in each toilet.

### **IYPT Office**

The Office used by Fight Administrators (Timotheus Hell, Max Lasserus and Michael Scherbela) will be in the room И-325 in the immediate vicinity of the groups A, B, and C.

Detailed specifications of the Office is given in the checklist. The Office will meet the requirements of the Fight Administrators, and the necessary equipment is either already available or will be purchased and brought to the office on time. There is a direct contact between Timotheus Hell and Andrey Poltavets who is responsible for the IT infrastructure of the university, During the visit to the Office, specific requirements were discussed with Roman Agrikov, Nikolai Titov, and Anna Krasnova.

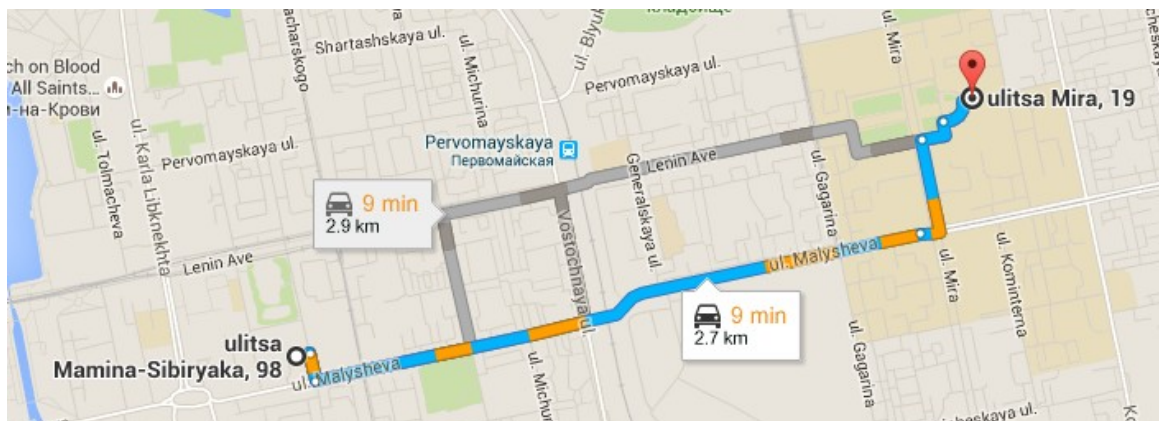

### **Hotel Accommodation**

All independent jurors, EC members, and regular visitors will be accommodated at Park Inn by Radisson Ekaterinburg Hotel (Ulitsa Mamina-Sibiryaka 98). The hotel is ranked as four-stars and is of a sufficiently high standard.

An open W-Fi network provided by the Hotel is available in the entire building.

Distance between the Hotel and the University is ca. 3 km. Transfer to the University will be provided in buses. Depending on the traffic, the transfer may take ca. 10-15 minutes. Walking is not practical other than for sightseeing of central streets (Ulitsa Malysheva and Prospekt Lenina). If someone wishes to go to/from the University or the Dormitory on their own (e.g. late in the night), taxi should cost less than 200.- RUR (3.- EUR).

### Dormitory Accommodation

All team members, team leaders, and 'visitors in the dormitory' will be accommodated at the university dormitory No. 5 (Ulitsa Malysheva 144). The rooms are of a sufficiently high standard for a university dormitory. Three floors of the Dormitory (levels 5, 6, and 9) will be occupied by the IYPT participants. The building has two elevators and a staircase. There are two vending machines near the entrance selling chocolates, snacks, and drinks.

Nikolai Titov and Roman Agrikov took part in the visit and answered questions about the facilities. Two senior managers of the Dormitory joined the visit.

The Dormitory is located in the center of the city in the immediate vicinity of grocery stores, food kiosks, cafes, and similar.

All rooms are grouped in the units of two. A door from the corridor leads into a very small lobby which then has doors to bathroom, toilet, and the two rooms. There is a fridge in the lobby of each unit. Each room has three regular beds, tables, chairs, a balcony, and wardrobes. The LOC will allocate rooms in the best possible manner, taking into account preferences of the teams and gender of the members.

Towels and bed linen will be provided, and will be replaced one time during the IYPT. Toilet paper and shower gel (in bottles, rather than in wall-mounted dispensers) will be provided. Nine 220 V power outlets are available in each room, plus 4 outlets in the small lobby of the unit.

An open W-Fi network provided by the university is available in the entire building. During the inspection, the connection was fast and stable, however the LOC suggested that remote corners of some rooms may have weaker signal.

There will be only one key per room, and it is impossible to provide an individual room key per team member. Everyone is expected to leave the key at the reception when leaving the Dormitory.

The reception is staffed 24/7 and there will be two volunteers living in the dormitory and available for the teams at all times. The LOC plans to have an information desk in the dormitory with local volunteers available to help with any practical issue.

Access to the building is restricted between 01h00 and 06h00 in the night. While anyone coming from the outside during these hours will be allowed in, it is not clear what procedure is to leave the building during the night. On one hand, leaving the building in the night is not in line with the university regulations. On the other hand, it is understood by Ilya Martchenko that team leaders are responsible for personal security of underage participants and have the right to allow night walks. Vladimir Kruzhaev will discuss the matter with the legal office of the university to provide a best solution.

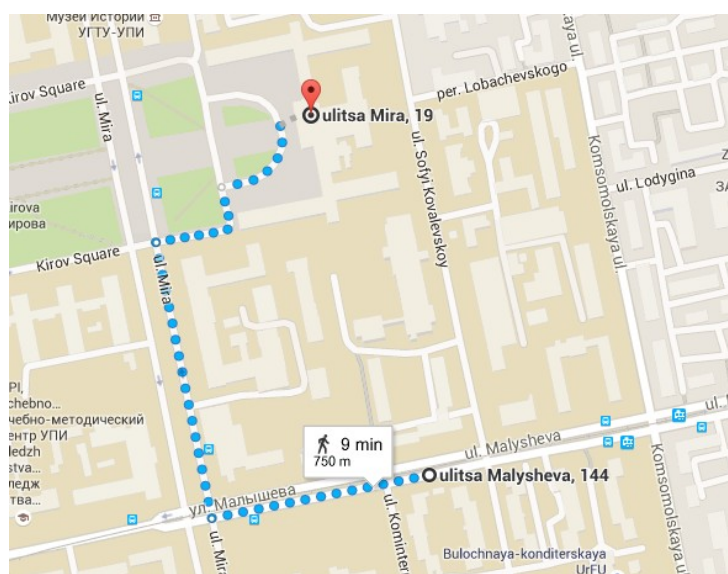

There are 4 basic kitchens per floor. Kettles, plastic cups, tea, and coffee will be provided in the kitchens.

A small gym is available on the ground floor.

There are 5 preparation lounges per floor, many with leather sofas. The lounges are rather small, have doors and can be used for team meetings, if needed. In an unlikely case that too many teams require such lounges, similar lounges are openly accessible on each floor of the Dormitory.

Distance between the entrance to the Dormitory and the entrance to the University is no more than 700 m, and probably less if shortcuts rather than large streets are used. It is estimated that walking from the Dormitory to the most remote PF group may take ca. 15 minutes.

## Dining Halls for Lunches and Dinners

Natalya Rakultseva, Director for the Public Dining Facilities, took part in the visits and answered questions about the preparations and facilities.

Lunches and dinners will be provided in the university building in four Dining Halls, catering food simultaneously. These Halls are in different parts of the building, rather than next door to each other. Two of the Halls are of a smaller capacity (50 and 90 seating places, respectively) and will be used for EC, IOC, and independent jurors. Two other Halls are of a larger capacity (140 seating places each) and will be used for team members and team leaders. Each participant will be informed (e.g. via information in their name badge) on what Dining Hall they should use.

The working hours of the Dining Halls will be relatively flexible, giving chance to have a meal for the guests coming too early or too late (within ca. 30 min margins).

Convenient labels (e.g. 1...4) for each of the Dining Halls will be selected. Detailed specifications of each Dining Hall are given in the checklist.

European-style food will be served on buffet-type tables. Small tags explaining ingredients (e.g. beef or pork) will be provided. Vegetarian options will be available.

## Dining Halls for Breakfasts

Breakfasts will be served in the Hotel and in the Dormitory, respectively.

Breakfast in the Hotel meets the standards expected from an international four-star hotel. Restaurant of the Hotel is located on the ground floor in an open area within a few meters from the lobby and the entrance. Parking lot is well visible from the restaurant.

Breakfast in the Dormitory will be served on buffet-type tables, offering a reasonable selection of food. The Dining Hall in the Dormitory is located on the ground floor close to the elevators. Is it also possible to enter the Dining Hall from the outside via separate doors to the right of the main entrance.

## Physics Fight assistants

Olga Inisheva is responsible for recruiting volunteers who will act as Physics Fight assistants. Those are not the same persons as team guides. At the moment, 24 PF assistants have been selected, including ex-participants of the Russian YPT and UrFU students. It is understood that they will be split in pairs such that one is more experienced with the regulations and more fluent in English than the other one.

Some of the PF assistants are not from Ekaterinburg and will not be available until the last day. Timotheus Hell plans to have the final training and give accounts to Newtoon on June 26. Ilya Martchenko had a separate discussion with Olga Inisheva on the features and technical details of Newtoon.

## Team guides

Yulia Pyankova coordinates volunteers who will act as team guides. A lot of volunteers have been selected and underwent training. These guides will act as the first point of contact with the LOC in case of any questions or problems. It is expected that one team leader of each team will be given a local Russian SIM card to facilitate coordination with the volunteers.

## **Hotline**

The LOC suggested an idea to organize a 24/7 telephone hotline to deal with any urgent questions about the IYPT and irregular situations. Similar hotlines were organized by the university in the past. Olga Inisheva and Ilya Martchenko were pleased to make clear that “any urgent questions about the IYPT” must not include questions on the physics of the problems.

## **Current status of the preparations**

As of now, it is expected that 29 teams take part at the IYPT. Anna Boikova coordinates with the teams to assist with securing Russian visas and is in contact with the Russian Ministry of Foreign Affairs. While we are short on time, no significant problems are expected.

A large and well-coordinated group takes care about logistics and local preparations and is in direct contact with Timotheus Hell and Ilya Martchenko.

## **Transportation and arrival**

Koltsovo International Airport (SVX) is located within 20 km of the city center. The waiting time at the airport should be small, and the LOC is well experienced with handling airport meet-and-greet. Teams are asked to submit their arrival details in CURIE as early as possible. During the check-in at the Dormitory, participant bags and badges will be distributed.

EC members are expected to arrive early enough on June 26 to allow for a short meeting. Timotheus Hell and his assistants will arrive to Ekaterinburg earlier to make final local preparations for the Physics Fights administration.

## **IOC meeting**

The IOC meeting will take place at Ramada Yekaterinburg Hotel & Spa. IOC members will be transferred from either Park Inn Hotel or Dormitory to this location. It was not possible to inspect Ramada, however it is understood that this is a high standard hotel with sufficient facilities for a normal IOC meeting.

## **Conclusion**

By submitting this report, the Inspector Ilya Martchenko can confirm that the preparation runs smoothly and efficiently and there are no considerable risks associated with the 29th IYPT 2016. Tasks requiring a special LOC attention have been discussed and outlined in this report. A well-executed IYPT is to be expected.
