

Motion to change regulations  
Young Physicists' Tournament

For a smooth run of the tournament we expect each team to have prepared a reasonable number of problem solutions. Therefor I suggest limiting the total number of rejectable problems to 7, to leave five problems for the challenge in the fourth PF in every case.

**Motion:**

**In Regulations, article IX, segment 2, end of paragraph 3, add a sentence: *The maximal number of different problems a team is allowed to reject during the whole competition is 8.***
